Sex Roles is a forum that will publish original research articles and theoretical manuscripts concerned with the basic processes underlying gender-role socialization in children and its consequences. The journal is cross-disciplinary, and pertinent investigations from the areas of psychology, psychiatry, sociology, anthropology, education, political science, and social work will be welcomed. The topics to be covered include: sex-role stereotypes and child-rearing practices; gender roles and political socialization; effects of contemporary social change upon sex-role perceptions and attitudes; effects of parental behavior and type of child care on children's development and adult life styles; gender-role socialization and sexual behavior; factors maintaining sex-role attitudes; sex-role socialization and its interaction with social, economic, and political organizations; and the effects of sex-role attitudes in work and social relationships. In addition to empirical investigations, the journal will also publish critical reviews of research and book reviews.
